

## Full Product Specification

### Takei Multibox

Code A5005

This multibox can be applied to many types of measurements. Especially designed for Flexion A and D, either being standing position or seated position.

### Product Information

“We are all experiencing a reduction of our flexibility or range of joint movement. *Use it or Loose it* is the mantra from the age of eight to maintain the natural flexibility. After we reach the mid 20’s, we’ll be losing only a small amount of flexibility. However, we really should put in place a monitoring program to maintain the flexibility of movement we have in our youth.” Steve Raven
